Data Quality, Reporting and Administrative Support | Remote Working

Professional Summary

Methodical, detail-focused professional with over 25 years of international experience in civil/geotechnical engineering, project management and technical data processing and administration, including nearly 4 years working fully remotely from home for a New Zealand firm. Experienced in checking and validating complex technical data, keeping accurate and confidential records in line with data privacy and information security requirements, producing structured reports, and supporting budget tracking and invoice processing. Confident user of Microsoft Excel, Outlook and Teams, experienced with ERP systems and project tracking databases, and quick to learn new systems. Keen to bring accuracy, organisation and reliable independent working to the Data Processing Support Officer role in Alzheimer's Society's Legacies team.

Key Skills

- **Data accuracy and quality control:** a methodical approach to cross-checking records and calculations, spotting errors and inconsistencies, and approving final deliverables to quality standards.
- **Data processing and record-keeping:** processing technical datasets in Excel and specialist software, and keeping clear, structured records that colleagues can find and use easily.
- **Databases and ERP systems:** used Beca's in-house ERP system and project tracking databases; familiar with Oracle Fusion Cloud ERP.
- **Reporting and analysis:** turning raw data into structured, easy-to-read reports and monitoring project key performance indicators (KPIs).
- **Confidentiality, data privacy and information security:** handling sensitive client and project records securely, in line with privacy guidelines and company policies.
- **Administrative and finance support:** managing team inboxes, invoice processing, budget and programme tracking, and document management.
- **Workload and deadline management:** managing multiple tasks and shifting priorities across projects, and delivering under tight deadlines.
- **Independent remote working and teamwork:** nearly 4 years home-based, staying in close contact with managers and colleagues in New Zealand through Microsoft Teams and Outlook.
- **Written communication:** wrote and reviewed technical reports; author of four published technical papers.
- **Learning and development:** quick to learn new systems (Microsoft Office, AutoCAD, 10+ specialist analysis packages); mentored junior staff.

Professional Experience

Senior Associate Geotechnical Engineer

Beca Ltd | Tauranga, New Zealand (remote from Greece 2022 – 2026) | 2016 – 2026

- Progressed from Associate to Senior Associate; as Team Leader led a team of 13 geotechnical engineers and geologists for 3 years (2019 – 2022), then worked fully remotely from Greece.
- **Data validation and quality assurance:** reviewed and approved engineering reports and calculations, checking accuracy and compliance with standards, and handled project information under strict data security and confidentiality requirements.
- **Reporting:** scheduled and analysed ground investigation and laboratory test results, turning raw data into structured, easy-to-read compliance reports.

- **Finance administration:** managed project budgets and programme tracking in Beca's in-house ERP system and project tracking databases, monitored KPIs and assisted with invoice processing, keeping financial records in line with corporate and client guidelines.
- **Remote coordination:** managed team workflows, coordinated regional schedules and kept international stakeholders informed through Microsoft Teams and Outlook.

Consultant Geotechnical Engineer (Freelance)
Self-employed | Thessaloniki, Greece | 2015 – 2016

- Provided independent engineering design, risk assessment and consultancy services.
- Kept clear, structured project records and handled sensitive client briefs with confidentiality and discretion.

Geotechnical Design Team Leader / Project Manager
Sigma 1 Consulting Engineers | Thessaloniki, Greece | 1999 – 2015

- Progressed from Geotechnical Engineer to Senior Engineer, then Design Team Leader and Project Manager.
- **Data management and compliance:** managed and organised technical data to quality standards, handling sensitive records securely and in line with privacy guidelines.
- **Analysis:** used specialist software to analyse project data, carry out risk assessments and design geotechnical works.
- **Administrative and operational support:** coordinated project planning, managed documents through their lifecycle, mentored junior staff and supported team members to meet project milestones on time.

Education

Master of Engineering (MEng) in Civil Engineering – Aristotle University of Thessaloniki (2011)

Master's Degree in Engineering Project Management – Hellenic Open University (1998)

Technical Skills

- **Microsoft Office:** Excel (data sorting, functions, reporting), Outlook, Teams; Windows.
- **Design:** AutoCAD.
- **Engineering analysis software:** Settle-3D, RockFall (statistical risk assessment), SLOPE/W, GSTABL7, RESSA, Wallap, MSEW, LPILE, RSPile, SWEDGE.

Languages

Greek: native. English: full professional proficiency (15+ years working in international environments).

Volunteering

Local parish support group, Greece: help organise community support activities to improve the well-being of vulnerable members of the local parish.
